Todd Hampson joins me today to talk about his book, *The Non-Prophet's Guide to the Rapture*. Todd has created a series of illustrated books that help people understand Bible prophecy with charts, graphics, and other helps that make complex topics easy to grasp. These books are especially useful for young people. Today, we're going to talk about why the Rapture should be on the hearts and minds of every believer, why a pre-Tribulation view is the most biblically consistent, and why the convergence of end-time signs means Jesus is coming very soon.

[Haman's Lies: Exposing the Ancient Roots of Antisemitism and Why the Spirit of Esther Must Arise](#)

The lies come first. The violence always follows.

Since October 7, 2023—the deadliest day for Jewish people since the Holocaust—the world has witnessed something alarming: the victims have been turned into villains. Mobs chant for Israel’s elimination. University professors justify terrorism. Social media floods with accusations that previous generations would have instantly recognized as antisemitic propaganda—yet today they’re repackaged as “justice.” And many people of good will don’t know what to think.

This isn’t random. It’s a pattern as old as the the book of Esther.

This book will help you:

- Recognize Haman’s ancient propaganda template—*Different, Disloyal, Dangerous, Disposable*—and see how it’s being repeated today
- Answer the twenty-five most common lies being told about Israel with historical truth and biblical clarity
- Discern the spirit behind the rising tide of hatred and global antisemitism
- Rise up like Esther to stand with God’s covenant people—for such a time as this

Don’t be deceived. Don’t be silent. Read this book and rise up.
